## REVISED AMENDMENT AND RESPONSE UNDER 37 CFR § 1.114

Mail Stop RCE Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

This Revised Amendment and Response is filed in connection with a Request for Continued Examination and in response to the Final Office Action mailed on March 13, 2007. The amendment was revised to add a reference to the previously canceled claims in the claims listing. The Request for Continued Examination was previously filed. Please amend the aboveidentified patent application as follows. A check for a one month extension of time is included with this filing.

## IN THE CLAIMS

Please amend the claims as follows:

- 1. (Currently Amended) A method for developing a real-time operating system, comprising:
  - a) specifying a set of n tasks, task(1) through task(n), to be scheduled for execution, at least one of the tasks of said set of n tasks being selectively configurable as a preemptive or a non-preemptive task;
  - b) specifying a scheduling algorithm for scheduling the execution of said set of n tasks; and
  - c) synthesizing source code with embedded from commands embedded in source code to implement a task scheduler that uses said scheduling algorithm and said embedded commands for controlling execution of said set of n tasks, said synthesized source code being executable on a target system after compilation.
- 2. (Currently Amended) The method of claim 1) further including specifying t init-tasks that are executed only once upon initial execution of said task scheduler, t being less than or
